Allianz UK & European Investment Funds - Allianz Gilt Yield Fund Share Class I (Income) (GBP)

Managed by Allianz Global Investors GmbH, part of Allianz Global Investors

ISIN: GB0031383390

Objectives and Investment Policy

The objective of the Fund is to maximise total return primarily through investment in UK Government Securities. Investors should be aware that the Fund's capital is at risk and there is no guarantee that the Fund will achieve its investment objective over any particular period or at all.

We may invest in gilts, overseas government bonds, government guaranteed bonds, supranational bonds, deposits, money market instruments, derivatives, collective investment schemes. At least 80% of the Fund's value will be invested in gilts. Up to 20% of the Fund's value may be invested in Sterling denominated (or hedged back to Sterling) debt securities, which are not issued by, but with a rating the same or higher than that of, the UK Government.

The Fund may use derivative instruments such as futures, options, options on swaps and swap agreements (e.g. interest rate swaps). The Fund may use the derivative instruments listed above for hedging purposes and/or for investment purposes.

Benchmark of the fund is FTSE Actuaries UK Conventional Gilts All Stocks.

You may redeem shares of the fund usually on each business day by 12:00.

We usually distribute the income of the fund on a semiannual basis.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and Reward Profile

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 4 might be subject to medium price fluctuations based on the historical volatilities observed.

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

Charges

These charges are used to pay the costs of running the fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest

Entry Charge	0.00%
Exit Charge	0.00%

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing Charges	0.32%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges shown are based on the fund's last financial year ending 31.08.2017. It may vary from year to year. It does not include transaction costs incurred when we buy or sell assets for the fund.

A dilution levy may be charged on purchases and redemptions of shares to protect the remaining investors against the costs incurred by the fund in buying or redeeming its investments. This levy may be charged where the fund is experiencing large levels of net purchases/redemptions and on "large deals" (i.e. deals of 2% or more of the value of the fund). The amount of any such dilution levy is calculated by reference to the estimated costs of dealing in the underlying investments using the rates calculated for the preceding quarter.

You will find more details about the calculation of the charges in the prospectus.

Past Performance

Past performance is not a reliable guide to future performance.

The past performance shown here takes account of all charges and costs with the exception of the entry and exit charge.

The fund was launched in 2002.

The performance of the fund is calculated in GBP.

Baillie Gifford Japanese Fund - Class B Shares

Accumulation Shares - ISIN GB0006011133 (also representative of Income Shares ISIN GB0006010945)

This Fund is a sub-fund of Baillie Gifford Overseas Growth Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund aims to produce attractive capital growth over the long term.

Policy

- To invest in any economic sector in Japan.
- Investment will be mainly in shares of companies.

Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.
- The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash.
- The indicator does not take into account the following relevant material risks:
 - Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
 - The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
 - Custody of assets involves a risk of loss if the custodian becomes insolvent or breaches duties of care.
 - The Fund's exposure to a single market and currency may increase share price movements.
 - Where possible, charges are taken from the Fund's revenue. Where there is insufficient revenue, the remainder will be taken from capital. This will reduce the capital value of the Fund.
 - The result of the UK Referendum on membership of the European Union introduces elements of political uncertainty and may have practical consequences for the Fund. Developments will be closely monitored.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.63%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- For the ongoing charges, the figure is for Accumulation shares and is estimated due to a reduction in the annual management fee. The ongoing charges figure may vary from year to year and will exclude the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The Fund's annual report for each financial year will include detail on the exact charges made.
- You can find further details about the charges in Part 5 of the Prospectus.

Past performance

The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Dodge & Cox Worldwide Funds plc – U.S. Stock Fund

GBP Accumulating Class

A sub-fund of Dodge & Cox Worldwide Funds plc

ISIN: IE00B50M4X14

SEDOL: B50M4X1

CUSIP: G2800S174

OBJECTIVES AND INVESTMENT POLICY

The fund seeks long-term growth of principal and income.

The Fund invests primarily in a diversified portfolio of U.S. equity securities. Under normal circumstances, the Fund will invest at least 80% of its total assets in common stocks, preferred stocks, securities convertible into common stocks and securities that carry the right to buy common stocks, including depositary receipts evidencing ownership of common stocks. The Fund may also purchase other types of securities, for example, preferred stocks, and debt securities which are convertible into common stock. The Fund may invest up to 10% of its total assets in U.S. dollar-denominated securities of non-U.S. issuers traded in the United States that are not in the S&P 500.

In selecting investments, the Fund invests primarily in companies that, in Dodge & Cox's opinion, appear to be temporarily undervalued by the stock market but have a favourable outlook for long-term growth. The Fund focuses on the underlying financial condition and prospects of individual companies, including future earnings, cash flow, and dividends. Various other factors, including financial strength, economic condition, competitive advantage,

quality of the business franchise, and the reputation, experience, and competence of a company's management are weighed against valuation in selecting individual securities. The Fund typically invests in medium-to-large well established companies based on standards of the applicable market. The fund may use derivatives to manage risk and help meet the fund's objective. A derivative is a financial instrument whose value is based on the performance of another financial asset, index, or investment. The fund may invest in other types of eligible investments which are disclosed in the fund's prospectus.

The base currency of the fund is U.S. dollars; your shares are denominated in pound sterling.

You may sell your shares on each day when banks in Ireland are open for normal business and the New York Stock Exchange is open for trading.

Dividend income will be reinvested in the fund and will not be distributed to you.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within a short period of time.

RISK AND REWARD PROFILE

◀ Lower Risk				Higher Risk ▶		
◀ Typically Lower Rewards				Typically Higher Rewards ▶		
1	2	3	4	5	6	7

This risk and reward indicator is designed to provide you with a measure of the price movement of this share class based on historical data over the past five years.

The indicator may not be a reliable indication of the future risk profile of the fund. The risk category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean a risk-free investment.

This share class of the fund is in category 5 because the fund invests mainly in equity and equity-related securities of companies. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the fund can fluctuate significantly over relatively short time periods.

The fund may also be exposed to other material risks that the risk indicator does not adequately capture. These may include:

- *Currency risk*: the risk of loss arising from exchange-rate fluctuations; and
- *Liquidity risk*: the risk that the fund may not be able to purchase or sell a security in a timely manner or at desired prices or achieve its desired weighting in a security.
- *Derivatives risk*: investment in derivatives may create leverage and may cause the fund to lose as much as or more than the amount invested.

More information on the risks of investing in this fund can be found in the fund's prospectus in the sections titled "Investment Risks and Special Considerations" and "Characteristics and Risks of Securities and Investment Techniques".

CHARGES

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.63%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The fund charges no entry or exit charges.

The ongoing charges shown are estimated and may vary from year to year. The figure does not include portfolio transaction costs and reflects a voluntary waiver by the investment manager of its investment management fee and/or out-of-pocket expenses, which may be discontinued at any time with 30 days notice to shareholders.

For more information about charges, please see the “Fees and Expenses” section of the fund’s prospectus.

PAST PERFORMANCE

You may switch into shares of another sub-fund of the umbrella fund without charge.

Global Property Fund

Accumulation C GB00B84L7Q94

A sub-fund of **HSBC OpenFunds**, an open ended investment company ("OEIC"), managed by HSBC Global Asset Management (UK) Limited.

Objectives and investment policy

- ▶ To provide long term capital growth.
- ▶ To invest predominantly in property securities and property related securities and collective investment schemes that, in turn, invest directly or indirectly in property, unlisted property and listed property securities. There will be no geographical restrictions.
- ▶ The Fund may invest in other collective investment schemes managed or operated by the ACD or an associate of the ACD or managed by a third party fund provider.
- ▶ The Fund may also invest directly in other types of transferable securities, money market instruments, deposits, cash and near cash and may use derivatives for the purposes of hedging and tactical asset allocation on a short or long term basis.
- ▶ The Fund can use borrowing and may also use a technique known as efficient portfolio management which aims to reduce risk or cost to the Fund in circumstances where this is likely to be of benefit.
- ▶ The Fund may use derivatives (financial instruments whose value is based on an underlying asset) to seek to offset against movements in currency exchange rates and falls in asset values. Derivatives may also be used to efficiently manage the Fund with the aim of reducing the risk associated with changes to prices within the market, reducing cost or to managing cash in the short term. The Fund may use derivatives in the future for investment purposes, on giving 60 days notice to Shareholders. It is not intended that the use of derivatives would raise the overall risk profile of the Fund.
- ▶ Income is rolled up into the value of your investment.
- ▶ You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- ▶ Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within a period of at least 5 years.

More about this rating

The rating is based on price volatility over the last five years, and is an indicator of absolute risk. Historical data may not be a reliable indication for the future. The value of an investment, and any income from it, may fall as well as rise, and you may not get back the amount you originally invested. The rating is not guaranteed to remain unchanged and the categorisation may shift over time. The lowest rating does not mean a risk-free investment.

Why is this fund in category 4?

Equity prices tend to fluctuate more than other asset classes as investors directly participate in underlying companies and their earnings. Real estate volatility can be greater than other market sectors as it is linked to progressive cycles in property markets.

Material risks not adequately captured by the risk rating above

- ▶ **Third-party risk** Governance of underlying assets remains the responsibility of third-party managers. Regular assessment is undertaken for third-party manager approval.
- ▶ **Liquidity risk** Liquidity is a measure of how easily an investment can be converted to cash without a loss of capital and/or income in the process. The value of assets may be significantly impacted by liquidity risk during adverse market conditions.
- ▶ **Exchange rate risk** Investing in assets denominated in a currency other than that of the investor's own currency perspective exposes the value of the investment to exchange rate fluctuations.
- ▶ **Concentration risk** Funds with a narrow or concentrated investment strategy may experience higher risk and return fluctuations and lower liquidity than funds with a broader portfolio.
- ▶ **Real estate risk** Property can be difficult to buy and/or sell quickly and the Fund Manager of underlying investments may apply a deferral on redemption requests. The value of property is generally a matter of the valuer's opinion rather than fact.
- ▶ **Derivative risk** The value of derivative contracts is dependent upon the performance of an underlying asset. A small movement in the value of the underlying can cause a large movement in the value of the derivative. Unlike exchange traded derivatives, over-the-counter (OTC) derivatives have credit risk associated with the counterparty or institution facilitating the trade.
- ▶ **Operational risk** The main risks are related to systems and process failures. Investment processes are overseen by independent risk functions which are subject to independent audit and supervised by regulators.

Charges for this fund

The charges you pay are used to pay the running costs of the fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
Charges taken from the fund over a year	
Ongoing charge	1.23%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The Entry and Exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.

A switching fee may be applied up to the amount of the entry charge shown if you switch your shares into this share class of this Fund.

The ongoing charges figure is based on last year's expenses for the year ending 15/10/2017. Charges may vary from year to year.

The ongoing charges figure above does not include portfolio transaction costs (the cost of buying and selling the underlying assets in the Fund). Further information on Charges can be found in the Fees and Expenses section of the full Prospectus.

Past performance

■ Fund

Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up. The past performance of this share class is calculated in GBP.

Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges, but not entry and exit charges.

The fund was launched on 26/11/2007.

Performance returns prior to the first share class price date of 03/09/2012 have been simulated using the track record of an older share class.

JOHCM UK Dynamic Fund

Y Accumulating GB00BDZRJ101

A sub-fund of J O Hambro Capital Management UK Umbrella Fund
Managed by J O Hambro Capital Management Limited

Objectives and investment policy

- The objective of the Fund is to achieve long-term capital appreciation through investment in a portfolio primarily invested in equity securities of companies listed on either of the two primary markets of the London Stock Exchange: the main market and AIM.
- At least 75% of the Fund's assets will at all times be invested in equity securities of companies domiciled or exercising the predominant part of their economic activity in the United Kingdom. The Fund may on occasion utilise this position to invest a proportion of its assets in equities listed on a recognised exchange outside

the UK. Investment will be made primarily in equity securities which are readily marketable, but investments will also be made in equity securities of smaller companies which can be more lightly traded. The portfolio is likely to be fairly concentrated with the Fund typically holding equity interests of between 35 and 50 different companies.

- Any income the Fund generates for this share class is accumulated.
- You can buy and sell shares in the Fund, before 5.30pm, on any day which is a working day in London.

Risk and reward profile

◆ Lower risk				Higher risk ◆		
◆ Typically lower rewards				Typically higher rewards ◆		
1	2	3	4	5	6	7

- The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

The risk and reward indicator:

- is based on simulated historical performance data and may not be a reliable indication for the future;
- is not guaranteed and may change over time.
- As this share class has not been in existence for 5 years, simulated performance data has been used.
- The lowest category does not mean that a share class is risk free.

The share class category reflects the following factors:

- Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.

- Your initial investment is not guaranteed.

In addition to the risk captured by the indicator, the fund value may be affected by:

- Any change in the Company's tax status or in legislation could affect the value of investments held by the Company.
- Political and /or regulatory Risks.
- Liquidity risk: The risk that some securities held by the Fund may be difficult or impossible to sell at the desired time and price. The Fund's investments include shares in small-cap companies. Small-cap companies tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile.
- Investors should note that a more detailed description of risk factors is set out in full in the Prospectus.

Charges

One off charges taken before or after you invest	
Entry charge	5.00%

JPM Europe Dynamic (ex-UK) Fund C - Net Accumulation a Share Class of JPM Europe Dynamic (ex-UK) Fund a Fund of JPMorgan Fund ICVC

ISIN GB00B845HL62

The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

Objective and Investment Policy

Investment Objective: To maximise long-term capital growth by investing primarily in continental European Equities.

Investment Policy: Continental European Equities are those issued by companies that are incorporated under the laws of, and have their registered office in, continental Europe, or that derive the predominant part of their economic activity from continental Europe, even if listed elsewhere. The Fund may invest in smaller companies.

This Equity based Fund invests in those stocks which the Investment Adviser believes will outperform irrespective of their Benchmark weighting.

The Fund may also use Financial Derivative Instruments (derivatives) for the purpose of Efficient Portfolio Management, including hedging, where appropriate.

The Fund may invest in assets denominated in any currency and non-Sterling currency exposure may be hedged back to Sterling.

Redemption and Dealing: Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Management Discretion: The Investment Adviser has the discretion to buy and sell investments on behalf of the Fund within the limits of the Objective and Investment Policy.

Benchmark: The benchmark of the Fund is FTSE All-World Developed Europe ex UK Index (Net).

The benchmark is a point of reference against which the performance of the Fund may be measured. The Fund may bear little resemblance to its benchmark.

Distribution Policy: This Share Class will reinvest income.

Portfolio Transaction Costs: The investment strategy used to manage this Fund aims to generate higher returns. A consequence of this investment strategy is that the volume of transactions and, therefore, transaction costs, are material. Portfolio transaction costs are paid from the assets of the fund. They are additional to the charges set out in the Charges section. The chart in the Past Performance section shows the Fund's performance including portfolio transaction costs.

Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 5 because its Net Asset Value has shown medium to high fluctuations historically.

Other material risks:

- ▶ The value of your investment may fall as well as rise and you may get back less than you originally invested.

- ▶ The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and general market conditions.
- ▶ The Fund invests in securities of smaller companies which may be more difficult to sell, more volatile and tend to carry greater financial risk than securities of larger companies.
- ▶ This Fund is aggressively managed, which may result in higher volatility of the Fund's performance and bigger differences between the performance of the Fund and its benchmark.
- ▶ For investors in Share Classes which are not hedged to Sterling, movements in currency exchange rates can adversely affect the return of your investment.
- ▶ Further information about risks can be found in "Part 11: Risk Warnings" of the Prospectus.

JPM Global Macro Opportunities Fund C - Net Accumulation a Share Class of JPM Global Macro Opportunities Fund a Fund of JPMorgan Fund ICVC

ISIN GB00B4WKYF80

The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

Objective and Investment Policy

Investment Objective: To provide positive investment returns over a rolling 3 year period in all market conditions by investing in securities globally, using financial derivative instruments where appropriate. A positive return is not guaranteed over this or any time period and a capital loss may occur.

Investment Policy: The Investment Adviser uses an investment process based on macroeconomic research to identify global investment themes and opportunities. The Investment Adviser uses a flexible asset allocation approach, using a broad range of asset classes, instruments and techniques. Allocations may vary significantly and exposure to certain asset classes, markets, sectors or currencies may be concentrated from time to time, in response to market conditions and opportunities.

The Investment Adviser will invest, directly or through the use of Financial Derivative Instruments (derivatives), in global Equity securities (including smaller capitalisation companies), Bonds, (including up to 100% in government and public securities, below investment grade and unrated debt securities), Commodity Index Instruments, currencies, Convertible Securities, collective investment schemes and cash and cash equivalents. Issuers of securities may be located in any country, including Emerging Markets.

The Investment Adviser may have net Long or net Short Position exposure to asset classes, industry sectors, markets and /or currencies depending upon market conditions and opportunities. This may result in a net short position at the overall Fund level. Long Positions will be

achieved directly or through the use of Financial Derivative Instruments, and Short Positions will be achieved via the use of Financial Derivative Instruments only.

The Fund may use Financial Derivative Instruments (derivatives) for investment purposes or Efficient Portfolio Management including hedging, where appropriate.

Although most of the non-Sterling securities will be hedged back into Sterling, the Investment Adviser will also use opportunities in the foreign exchange market to maximise returns.

The Fund may invest in China A-Shares via the China-Hong Kong Stock Connect Programmes.

Redemption and Dealing: Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Management Discretion: The Investment Adviser has the discretion to buy and sell investments on behalf of the Fund within the limits of the Objective and Investment Policy.

Benchmark: The benchmark of the Fund is ICE 1 Month GBP LIBOR.

The benchmark is a point of reference against which the performance of the Fund may be measured. The Fund will be managed without reference to its benchmark.

Distribution Policy: This Share Class will reinvest income.

Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and the volatility which is consistent with the risk limit of the Sub-Fund.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 5 because its Net Asset Value has shown medium to high fluctuations historically and this category is consistent with the risk limit of the Sub-Fund.

Other material risks:

- ▶ The value of your investment may fall as well as rise and you may get back less than you originally invested.
- ▶ The Fund aims to provide a positive return in any market conditions over a rolling 3 year period, although this is not guaranteed.
- ▶ The Fund can use sophisticated investment techniques that differ from those used in traditional equity funds.
- ▶ The Fund should not be used as a substitute for liquidity funds or cash accounts.
- ▶ The Sub-Fund uses financial derivative instruments for investment purposes. The value of financial derivative instruments can be volatile and may result in gains or losses in excess of the amount required initially to establish a position in the derivative. The ACD is required to disclose in Appendix A of the Prospectus the sum of the gross notional exposure of the financial derivative instruments used (including those used for hedging or efficient portfolio management) as the expected level of leverage. However, this figure does not take into account whether the instrument increases or decreases

investment risk and so may not be representative of the overall level of investment risk in the Sub-Fund.

- ▶ Some financial derivative instruments (derivatives) traded on an exchange may be illiquid, and as a result, may need to be held until the derivative contract position expires. This may have an adverse impact on the return of the Fund.
- ▶ The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and general market conditions.
- ▶ The value of bonds and other debt securities may change significantly depending on market, economic and interest rate conditions as well as the creditworthiness of the issuer. Issuers of bonds and other debt securities may fail to meet payment obligations (default) or the credit rating of bonds and other debt securities may be downgraded. These risks are typically increased for below investment grade and certain unrated securities, which may also be subject to higher volatility and be more difficult to sell than investment grade securities.
- ▶ The Fund invests opportunistically and exposure to the markets may vary substantially over a short period of time depending on market conditions. Therefore the Fund may not be fully invested in rising markets; conversely the Fund could be more than fully invested in a falling market. In both circumstances the performance of the Fund would suffer.
- ▶ To the extent that any underlying assets of the Fund are denominated in a currency other than Sterling and are not hedged back to Sterling, movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.
- ▶ The value of securities in which the Fund invests may be influenced by movements in commodity prices which can be very volatile.
- ▶ Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement

practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements. Emerging market securities may also be subject to higher volatility and be more difficult to sell than non-emerging market securities.

- ▶ The Fund may invest in China A-Shares through the China-Hong Kong Stock Connect Programmes which are subject to regulatory change, quota limitations and also operational constraints which may result in increased counterparty risk.
- ▶ The Fund invests in securities of smaller companies which may be more difficult to sell, more volatile and tend to carry greater financial risk than securities of larger companies.

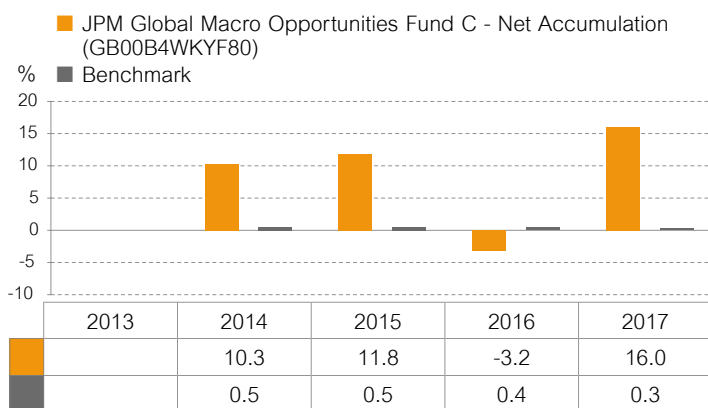

- ▶ The possible loss from taking a short position on a security (using financial derivative instruments) may be unlimited as there is no restriction on the price to which a security may rise. The short selling of investments may be subject to changes in regulations, which could adversely impact returns to investors.
- ▶ The Fund may be concentrated in a limited number of securities, industry sectors or countries and as a result, may be more volatile than more broadly diversified funds.
- ▶ Further information about risks can be found in "Part 11: Risk Warnings" of the Prospectus.

Merian Global Equity Absolute Return Fund R (GBP) Hedged Accumulation Shares (IE00BLP5S809)

A sub fund of Merian Global Investors Series Plc. Managed by Merian Global Investors (UK) Limited

OBJECTIVES AND INVESTMENT POLICY

Objective: capital growth, while closely controlling risk. The Fund also aims to deliver an absolute return (above zero performance, irrespective of market conditions) over rolling 12 month periods.

Policy: the Fund aims to achieve its objective within a volatility limit of up to 6 per cent.

The Fund may invest in company shares and similar investments listed or located anywhere in the world. The Fund will adopt a structured neutral position (balancing long and short positions aiming to build a portfolio with zero market exposure) at all times. The Fund will hold a long position (benefit from buying an asset with the aim of selling it later at a higher price relative to the market) in an investment expected to outperform the market, and short (benefit from the sale of an asset with the aim of buying it later at a lower price relative to the market) an investment expected to underperform the market.

The Fund uses derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment), with the aim of generating returns and reducing the overall costs and/or risks of the Fund. The Fund can take long and short positions through the use of derivatives, which may result in the Fund being leveraged. Leverage magnifies the exposure of the

Fund to greater than the underlying investments. In such situations, returns may rise or fall more than they would have done otherwise, reflecting such additional exposure.

The Fund also aims to protect against exchange rate movements between the Fund's base currency and the share class currency by hedging.

Portfolio construction is driven by systematic analysis of companies against several distinct characteristics including stock price valuation, balance sheet quality, growth characteristics, efficient use of capital, analyst sentiment and supportive market trends to identify attractively priced investment opportunities.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Treatment of income: as shares in this class are accumulation shares, income from investments will be reinvested into the Fund and reflected in the value of the shares.

Dealing: you can buy and sell shares on business days where retail banks are open for business in Dublin and London (excluding Saturdays, Sundays and public holidays).

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Typically lower rewards ← Typically higher rewards

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 4 have in the past shown moderate volatility. With a fund of category 4, you have a moderate risk of losing money but your chance for gains is also moderate.

Investment risk - whilst the Fund aims to deliver above zero performance irrespective of market conditions, there can be no guarantee this aim will be achieved. A capital loss of some or all of the amount invested may occur.

Currency risk - the Fund is denominated in US Dollars and may use techniques to try to reduce the effects of changes in the exchange rate between the currency of the underlying investments and the base currency of the Fund. These techniques may not eliminate all the currency risk. This share class is denominated in British Pounds. The hedging process may not give a precise hedge, and some currency risk may remain. The value of your shares may rise and fall as a result of exchange rate movements between these currencies.

Derivative risk - the Fund uses derivatives to generate returns and/or to reduce costs and the overall risk of the Fund. Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the Fund takes its charges from the income of the Fund in the first instance. The impact of Fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the Fund to cover these charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

CHARGES

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
<i>This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.</i>	
Charges taken from the Fund over a year	
Ongoing charge	0.84%
Charges taken from the Fund under specific conditions	
Performance fee	20.00% of any returns the Fund achieves above the average Bank of England Base Rate, provided the Fund's share price has increased since the last time a performance fee was paid.

The charges shown are the maximum figures. In some cases you might pay less. You can find out your actual charges from your financial adviser or distributor.

The ongoing charges figure is based on the expenses of the Fund for the 12 month period ending July 2018. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.

It is not the intention for a switching charge (2.50%) to apply but the Fund reserves the right to impose a switching charge in the future.

In the Fund's last financial year, the performance fee was 1.65% of the value of the share class. 1.65% represents the actual performance fee charged for the year ending 31/12/2017 as a percentage of the weighted average net asset value of the share class for the same period.

You can find out more details about the charges by looking at the *Fees and Expenses* section of the prospectus.

PAST PERFORMANCE

■ R (GBP) Hedged Accumulation Shares

Past performance is not a guide to future performance.

The past performance shown does not take into account any entry or exit charges but does take into account the ongoing charge, as shown in the Charges section.

The value of the class is calculated in British Pounds.

Royal London UK Government Bond Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00B881TW52
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The investment objective of the Fund is to maximise total investment return (income and capital growth) over the medium (5 years) to long (7 years) term.

Policy The Fund invests mainly in bonds issued or backed by the UK government. The Fund may also invest in bonds issued by companies that are of the highest credit quality. The Fund may use derivatives, but for efficient portfolio management purposes only.

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Concepts to understand

Bonds Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

Derivative A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Efficient Portfolio Management An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

The following share classes are available for the Fund: Income A, Income M, Accumulation M, Income Z and Accumulation R. All share classes are subject to a minimum investment. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

Lower potential risk/reward Higher potential risk/reward
The Fund is ranked in risk category 4 because its unit price has shown a medium level of volatility historically. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee.

Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Concentration Risk Funds which invest in a smaller number of securities can carry more risk than funds spread across a larger number of companies. To the extent that the Fund has exposure to an issuer, geographical area or type of security that is heavily affected by an event, either positive or negative, its value may rise or fall.

Credit Risk Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

For more about fund risks, see the "Risk Factors" section in the Prospectus (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/)

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge 0.00%

Exit charge 0.00%

Charges taken from the fund over a year:

Ongoing charge 0.43%

Charges taken from the fund under specific conditions:

Performance fee none

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

For the entry and exit charges, if you are not eligible for this share class you will pay more than the amounts shown. Consult your financial adviser.

Ongoing charges figure is based on expenses for the year ending 31 October 2017. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

For more about charges, see the expenses section in the full Prospectus and supplement (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/)

Past performance

The graph shows fund performance over the past 10 years where available. Past performance is no guarantee of future performance. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 8 February 1990 and the share class on 26 November 2012.

The Royal London UK Government Bond Fund
(Accumulation - Class M Shares) in GBP

The Fund was initially launched as a unit trust but was converted to an open-ended investment company (OEIC) with effect from 30 April 2010.

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

Publication Date: This Key Investor Information is accurate as at 4 October 2018.

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Investment Grade Corporate Bond Fund, a Sterling denominated sub fund of the Standard Life Investment Company, Platform 1 Accumulation Shares (ISIN:GB00B6TRYW36). This fund is managed by Standard Life Investments (Mutual Funds) Limited.

Objectives and Investment Policy

The fund aims to generate an income, before charges, above that available on UK Government bonds by investing mainly in Sterling denominated corporate bonds.

The fund is actively managed by our investment team who may also invest a proportion of assets in other bonds (e.g. gilts) and/or money market instruments to try to take advantage of opportunities they have identified.

The fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management) or to meet its investment objective. Derivatives may be used to provide market exposures different to those that could be achieved through

investment in assets in which the fund is primarily invested. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

Any income, for example interest income, received by the fund will be reinvested.

Investors in the fund may buy and sell shares on any normal business day.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

Risk and Reward Profile

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes.

The lowest rating does not mean risk free.

The fund is rated as {4} because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by

the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses. The fund makes routine use of derivatives.

- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.

The fund employs a single swinging pricing methodology to protect against the dilution impact of transaction costs. A change in the pricing basis will result in movement in the fund's published price.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Charges

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.
